ABOUT ME

I am an ambitious backend developer with a primary focus on building web applications using Python (Django, FastAPI). My goal is to continuously expand my knowledge in backend and frontend technologies, aiming to grow into full-stack developer.

SKILLS

Languages
Python, Typescript, Javascript, Java, HTML, CSS, SQL

Frameworks
Django, Django Rest Framework, Flask, FastAPI, Spring Boot, Express, React, Next.js

Tools
Git, Docker, Keycloak

EDUCATION

Bachelor of Engineering in Computer Science | 2021 - 2025
Uniwersytet WSB Merito w Gdańsku

WORK EXPERIENCE

Frontend Developer | 04.2024 - 11.2024
WEB4PRO | Internship

- Developed and implemented new features for a web application using **React** and **Firebase**
- Collaborated with a team, participating in sprint planning and daily stand-ups as part of **Agile workflow**
- Performed backend tasks using **Firebase,** including databse structure planning and maintaining it

PERSONAL PROJECTS

Eventio | Django, Alpine.js, HTMX, PostgreSQL

An application designed to allow users to manage events. It enables users to create new events, register for events, view and search for them. The platform supports adding reviews, ticket purchasing, and user account management.

eventio.madgotten.me

Tasksync | Spring Boot, React, PostgreSQL, Keycloak

An application offering similar functionalities to Trello. It allows users to create boards and invite others to collaborate on them. Users can create tasks and place them in appropriate lists using drag-and-drop mechanism. The app was developed with React and Spring Boot, and uses Keycloak as an authentication server.
